Nuestros estandares de calidad

Cada año, se sugiere la inclusión de aproximadamente 3.500 títulos nuevos en Scopus, pero solo el 33% de estos títulos cumplen con nuestros criterios mínimos. Y de estos aproximadamente 1.200 títulos, solo el 50% son aceptados tras la revisión de un comité independiente (Content Selection and Advisory Board - CSAB)

How to turn your thesis into an article

The process of writing a manuscript is considerably different from the work undertaken for academic degree requirements.

Design Thinking: Turn research into innovation

Innovation is vital for most working fields and research is not an exception. In fact, innovation is a central tenet of research that can advance the field based on previous body of knowledge.

A guide to journal citation metrics

Metrics have become a fact of life in many - if not all - fields of research and scholarship.

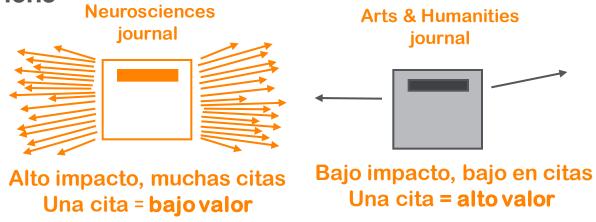

Métricas para revistas

- CiteScore: La media de citas por documento que un título recibe en un período de 4 años
- SNIP (Source-normalized impact per paper): mide el impacto de la cita por publicación ponderando las citas por campo de asunto

 SJR (SCImago Journal Rank): La cita es ponderada dependiendo de qué área de conocimiento viene

Métricas para revistas

Considere la accesibilidad de la revista

La revista está indexada en bases de datos internacionales?

La publicación en una revista indexada definitivamente mejorará la visibilidad de su artículo.

Haga una lista de las revistas disponibles en su área temática y examine el tipo de artículos publicados en ellas (trabajos teóricos o trabajos más aplicados)

Compare la calidad de sus artículos con los publicados en estas revistas.

Asegúrese de que los objetivos de la revista coincidan con los de su investigación

Es muy importante preparar su manuscrito de acuerdo con las guías para autores "Guide for authors"

Cada revista tiene un formato específico

Data

- Numbers in text and tables should always be provided if % is shown
- Means should be accompanied by SDs, and medians by IQR
- p values should be given to two significant figures, unless p<0.0001

Drug names

- Recommended international non-proprietary name (rINN) is required
- We encourage use of neuroscience-based nomenclature for psychotropic drugs

References

- Vancouver style—eg,
 - —Smith A, Jones B, Clements S. Clinical transplantation of tissue-engineered airway. Lancet 2008; **372**: 1201–09.
 - —Hourigan P. Ankle injuries. In: Chan D, ed. Sports medicine. London: Elsevier, 2008: 230-47.
- Numbered in order of mention in Webappendix and numbered separately from references in the full paper

Figures

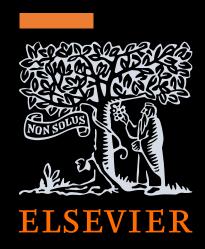

- All images must have a minimum resolution of 300 dpi, width 107 mm
- Main figure heading should be in 10 point Times New Roman font BOLD
- Legends should be in 10 point, single spaced
